

BUSINESS OPPORTUNITIES FROM ISRAEL

May 2018

Company Name	Galim Software & Systems for Industry Ltd. (41960)
Contact Person	Initial contact will be made through the Federation of Israeli Chambers of Commerce: Ms. Yonat Keren International Relations Division Telephone: 972-3-5631020 Email: yonatk@chamber.org.il
Website	www.galimsi.com
Year of Establishment	2005
No. of Employees	1-10
Offer No.	87831
Summary of offer	<i>Export/Joint Venture/Representation/Franchisee:</i> PC and robot software for robotic applications - machine tending, palletising and other
<p><u>Description of Offer</u></p> <p>We specialize in universal software solutions and have developed innovative software for industrial automation/robotics, specifically machine tending and palletizing applications. The product can provide ready-made solutions for customers' own hardware and robotics in a various types of industrial automation processes; it is used by leading Israeli and Turkish companies. We are looking for automation or hardware manufacturers who may be interested in using software.</p> <p>We have extensive experience in industrial software applications and robotics, and we have built software solutions and installed them in a variety of factories at leading companies. We can provide flexible software solutions for a variety of hardware in the fields of machine tending and palletizing. Our motto is reliability, customer support, speed and efficiency.</p> <p>We offer ready-made PC software for controlling industrial robots, which will be typically organized around a production cell. Two specific varieties of software are offered, one to control robotic machine tending applications and one to control robotic palletizing applications. Both types can control a range of applications starting from simple systems, e.g. one robot tending one machine or palletizing one production line up to more complex systems, e.g. multiple machines or production lines and also possibility of multiple robots.</p>

The software products include possibilities of optimization to ensure maximum throughput and productivity. The software enables real time work and operation is controlled using an operator friendly interface

The software has the following advantages:

- It is the only ready-made PC-based software application.
- Applications using the software can be installed and set up quickly.
- The software has user-friendly operator screens including ability to customize language, run time interface, also logging and statistics available.
- Unlimited number of parts is definable on set-up screens.
- The software is scalable for a variety of architectures.
- For machine tending specifically, a variety of machines and robots are supported. Parts may arrive and depart in a variety of ways (pallets, trays, conveyors etc.). Sequence of operations is flexible and may be defined onsite.

In short, the software is an "off-the-shelf" product which includes an ability to customize as required. The product offered consists of software and support for installation. The product is intended for use in industrial enterprises, for those who prefer to buy an "off-the-shelf" product.

Systems based on the software have been installed at a variety of national and international factories in Israel and Turkey.

Potential Partners

Hardware manufacturers or integrators or automation and robotics companies who want to get an "off-the-shelf" product.
