## **BREMINO GROUP**

Bremino Group, a managing company for *Special Economic Zone Bremino Orsha*, encourages foreign businesses to become its residents in such industries as textile and footwear, jewelry and packing materials.

Bremino Group as a national logistics operator is able to operate sizeable freight flows, with a multimodal logistical and industrial hub in Orsha working at full capacity (500 km away from Moscow and Kyiv, 600 km away from Riga).

The services provided by Bremino Group include customs logistics and warehousing, supply chain management, industrial logistics, logistical audit and marking. Bremino Group intends to use Orsha as an international hub to distribute commodities imported by the Eurasian Economic Union member states.

Bremino Group would appreciate the presence of DEIK members (primarily manufacturers of footwear, leather articles and clothes) and Turkish transport and logistical companies at its **seminar on 27 November at 10 am**. Businesses interested in more engagement with the Eurasian Economic Union and seeing Belarus as a gateway to the overall Union market are most welcome to attend the seminar.
